Maya was 7 when she was diagnosed with Acute Myeloid Leukemia. She relapsed from her aggressive disease twice and endured 3 bone marrow transplants. Maya received hundreds of life sustaining blood and platelet transfusions during her treatments. Her family is forever grateful to these life saving donors... complete strangers who kept Maya alive. Please join us in celebrating Maya's 16th birthday by donating the gift of life in her memory.

Schedule online: <https://hoxworth.org/groups/maya.html> or call 513.451.0910
