To access an informational letter for parents as well as a copy of the Parental Consent Form please go to: <http://bit.ly/HoxworthForms>

Maya Collins
Age 14
Mason, OH

Maya was 7 when she was diagnosed with Acute Myeloid Leukemia. She relapsed from her aggressive disease twice and endured 3 bone marrow transplants. Maya received hundreds of life sustaining blood and platelet transfusions during her treatments. Her family is forever grateful to these life saving donors... complete strangers who kept Maya alive.

MARROW DRIVE IN MEMORY OF *Maya Collins*

Please visit the **BE THE MATCH** booth at the blood drive to get swabbed to be a potential bone marrow donor. Maya's life was saved by two anonymous donors. They will always be our heroes! You too can be a hero and save someone's life!
